Audubon Society of the Capital Region
Is Excited for this Year’s Bird Seed Sale!

It is that time of year again, the Bird Seed Sale is on! As in previous years we work with CFD (Co-operative Feed Dealers) a locally based company that prides itself on providing seed mixed and sourced primarily from high quality regional suppliers.

This sale serves as an important source of funding to support existing and launch new programs throughout the year while providing our local birds with food through winter.

Purchases are **TAX FREE** to you as we are a 501c3 non-profit organization.

For more information on ways to order or products, check out pages 2 and 3!

**Being aware of Grackle Activity**
By Fred Brockis

This month’s bird of the quarter is the Grackle but here we’d also like to talk about its potential infestations across the country.

Grackles are an abundant type of blackbird. Flocks of them in early 2020 took over two Texas grocery store parking lots (1 in Houston, 1 in Austin).

(Videos can be found on YouTube.)

In areas where Grackles have become problematic some towns go so far as to employ expensive bird control service companies. In Austin, municipal workers fan out at first light with wooden hand clappers to scare the birds along with blue laser flash lights to encourage them to leave downtown where they are most bothersome. These procedures do not harm them.

Grackles can also be scared away with hawk decoys, predator eye balloons, & reflective eye objects hung near your lawn. A study at UAlbany also found that a 1% concentration of garlic oil is another safe deterrent. This is the method most often used at airports.

Grackles have been spotted and documented in 2020 all over the Capital District in preserves, farms, and lakes. However, I could find no record of the flocks causing any problems locally. Thus the Grackle serves as an example of a species which, while beneficial and fun to spot can become troublesome if not monitored well.
ANNUAL BIRD SEED SALE

The Audubon Society of the Capital Region will be hosting their Annual Bird Seed Sale. This is a great opportunity to help our organization while stocking up to feed your favorite backyard birds over the winter months. We will be taking orders September 8 through October 18, 2020. Purchase seed with us and pay no tax!

Help support your local chapter of the National Audubon Society!

Order Online at www.CapitalRegionAudubon.org/store or send a completed order form (next page) and payment to our P.O.Box.
### 2020 Bird Seed Sale Fundraiser Order Form

<table>
<thead>
<tr>
<th>Bird Seed</th>

### Buy a Bag, Donate a Bag
ASCR has partnered with [Project Growth](#) and [Lawson’s Lake](#). Last year, the youth of Project Growth made a Bird Sanctuary. Please consider donating a seed or suet to Lawson’s Lake through ASCR in order to help them attract birds to their new Sanctuary. Your donation is tax deductible. Yes—please add an additional bag of seed to my order:

I was recently watching a new docuseries when something peaked my attention, birds predicting the severity of hurricane season. Naturally, I googled it and lo and behold the National Audubon Society had published an article last year titled “Are These Birds Better Than Computers at Predicting Hurricane Seasons?”.  

In a nutshell, yes, birds, particularly the Veery, quite possibly predict the severity of coming hurricane seasons. Research by Christopher Heckscher over the course of nearly twenty years indicates that the Veery (a type of thrush about the size of a robin and native to North America with migratory patterns toward Southern Brazil—check out allaboutbirds.org for more cool facts) will migrate based on the severity of the coming Hurricane season.

During years of mild hurricane activity the veery extends its breeding season and waits to migrate south. Alternatively, during heavy hurricane seasons, the veery will cut its breeding season short and get out of dodge. Making these birds some pretty informed and informative creatures!

I can’t help but wonder, as we enter into our fall season and peak migratory season (which started in July believe it or not) what our own birds may be trying to tell us.

Obviously it is all a bit more complicated than just this, I’d recommend checking out the actual article found by clicking here to learn more.

**Birds Predict Hurricane Season**

**Bird Words “Rectrix”**

By Fred Brockis

**Bird Words**

Rectrix (plural: rectrices)

As a bird word rectrix refers to any of the quill feathers of a bird’s tail that help to control its flight direction.

It has another meaning wholly unrelated to birds. It refers to a woman who governs.

This word comes from the Latin “reector” meaning “one that directs”. Rectrix is the feminine of rector.
Do you love to watch birds and wildlife? Do you enjoy spending time outdoors? Are you looking for ways to volunteer that allow you to do both of those things? Then Bald Eagle Nest Watch might be for you!

In this fun and flexible program, volunteers monitor a Bald Eagle nest once a week, and submit observations via an online citizen science website (citsci.org). This data is used by the NYS DEC to help monitor Bald Eagle nests, and success rates, in this area.

With many active Bald Eagle nests in our area, we could really use more volunteers to help with monitoring.

If you think you might be interested, please contact Jennifer Ford, Bald Eagle Nest Watch coordinator at jsf@nycap.rr.com for more information.

- Thank you!

What did I miss?

Our work continues!

Things may have slowed down a touch for the summer as we all enjoy some fresh air, found creative ways to enjoy company while social distancing and squeezing in some birding activities of our own, but we’ve still been chugging forward!

✔ Discussions on our chapter strategy have continued!

✔ Program planning remains under way with an continued virtual presence.

✔ We’re preparing for our Bald Eagle Nest Watch!

✔ Maintained existing conservation efforts.

✔ Are excited to launch this years Bird Seed Sale!

Be sure to check back in our next issue as we hope to get busy this winter!
ASCR Board Meetings
Second Mondays of every month.

We postponed meetings through the summer due to COVID 19, but will soon resume them! However, in order to remain safe and adhere to CDC guidelines we will continue to host them via Zoom Meetings for the time being.

While we hope to eventually resume in-person meetings we would like to stress that all persons are welcomed to join us virtually! Please contact us via email to receive a meeting invitation.

We hope to see you there!

Contact us at: info@capitalregionaudubon.org for more on how to attend a virtual meeting.

We’re trying out hand at virtual events!

Please join our mailing list to remain privy to our upcoming events! Keep your eyes peeled for our next Webinar focused on Reducing and Preventing Bird Window Collisions in your home!

Please bear with us as we continue to organize and plan our 2020 programs. With the COVID-19 outbreak we consider it our responsibly to remain diligent in the safety and friendliness of our programs. As a result, all events are subject to change based on CDC, NYS and Federal directives. Please be sure to check out our website or Facebook for regular updates, subscribe to our mailing list and attend our virtual meetings to stay in touch.

Have ideas you’d love to share? Interested in planning an event with us?

Reach out at: info@capitalregionaudubon.org

Be sure to check our website for more programs and information!

Upcoming Events

Bird of the Quarter
By Fred Brockis

The Grackle:
- Consists of 11 species
- Is native to North & South America.
- Favor agricultural areas & lawns.
- Form massive flocks in winter.
- Are federally protected.
- Can be very aggressive and very noisy.
- Females lay 1-7 eggs which incubate 11-15 days.
- Are very territorial around their nest.
- Eat tons of harmful bugs and grubs (including June bugs and Japanese & rose beetles)
- Make great yard guests.

The “Common Grackle”:
- Is 11-13 inches and weighs 3.9 oz.
- Males & females make a short squeak followed by a high-pitched whistle, lasting less than a second. Think: “rusty gate”.
- Males are glossy iridescent black & females brownish and smaller.
- A sub-species is the distinctive ‘purple grackle’. They are large and lanky with long legs, a long tail, and a heavy bill.
Calling Volunteers!

Volunteers make the activities of ASCR possible and without them we could not host the many events, activities and projects we strive to provide for our birds and community!

Interested in starting/planning a new program? Just want to get involved? Lend a helping hand?

We love new faces and energy! Especially as we begin our journey with our new strategic plan!

No experience necessary! Just a positive attitude and desire to help!

Contact us at: volunteer@capitalregionaudubon.org

Join our volunteer mailing list: https://www.capitalregionaudubon.org/volunteer.php

Discovering Plirding

Plirding (v.) - to pick up litter while birding, this term was coined originally by Ray Brown’s Talkin’ Birds.

If you haven’t heard of Ray Brown’s Talkin’ Birds, they are a birding group, radio and podcast producer based out of Massachusetts founded in 2006 with over 75,000 podcast listeners to date! Talkin’ Birds aims to encourage people to be involved, informed and improving our natural environment.

The plirding initiate is geared to empower hikers, birders and nature enthusiasts alike to clean up our local trails, pointing out that items as small as fishing line to old balloons often get left behind or missed. So why not multitask? Enjoy the weather and birds while also leaving a positive impact.

Plirding can simply mean carrying an old grocery bag along and picking up small items as you go, or taking multiple containers and collecting actively. Every action helps. For more information and tips visit Ray Brown’s Talkin’ Birds’ website at:

https://www.talkinbirds.com

And remember as “Margaret Mead once said, ‘Never doubt that a small group of concerned citizens can change the world. Indeed, it is the only thing that ever has.’” (sourced Ray Brown’s Talkin’ Birds).
Do you know what kind of tree has leaves like this?
Hint: It is Native to New York AND we use the sap for syrup!

Looking to have an impact in your community?

Become an Audubon Society of the Capital Region **Chapter Supporter.**

As a Chapter Supporter, 100% of your membership dues stay local. This helps us support local conservation efforts, continue to promote birding and bird education, and to support other special initiatives, such as the construction of bird blinds and camp sponsorships for youth. The Chapter Supporter membership is just $20. In return you get:

- An official ASCR Chapter Supporter Membership card
- An ASCR Chapter Supporter window cling to prevent window strikes
- The satisfaction of knowing you are supporting local birds and their habitats

Click here for more information on how you can become an ASCR Chapter Supporter!!
